---

## PROJECTS

### E-Commerce Website (MEAN Stack)

GitHub: [https://github.com/drashti2023/Organic\\_App-Project.git](https://github.com/drashti2023/Organic_App-Project.git)

- Built a full-featured Angular + Node.js app with JWT authentication & product management.
- Integrated MongoDB and developed secure RESTful APIs.

### Blog Web App (MERN Stack)

GitHub: <https://github.com/drashti2023/Blog-Project.git>

- Created a blog platform with user login, post CRUD, and token-based auth (JWT).
- Used React frontend with Express & MongoDB backend.

### Tourism Website Clone

GitHub: <https://github.com/drashti2023/Tourism-website-clone.git>

- Designed responsive static site for an NGO using HTML, CSS, and Bootstrap.
- Implemented booking inquiry UI & image carousels for destinations.
